

TE Connectivity Return Goods Process

Team-5: Fangyuan Li, Bowen Cai, Mengdi Zheng, Dun-Yang Lin, Ming Zhu

Outline

- Introduction of TE Connectivity & Background of goods return process
- AS-IS process
- Issues in AS-IS process
- Improvements
- TO-BE process
- Q&A

Introduction of TE Connectivity

- \$14 billion annual income
- Design and manufacture sensors and connectivity products in various industries
- Utilize ERP system to fulfill operation functions requirements

Background of Goods Return Process

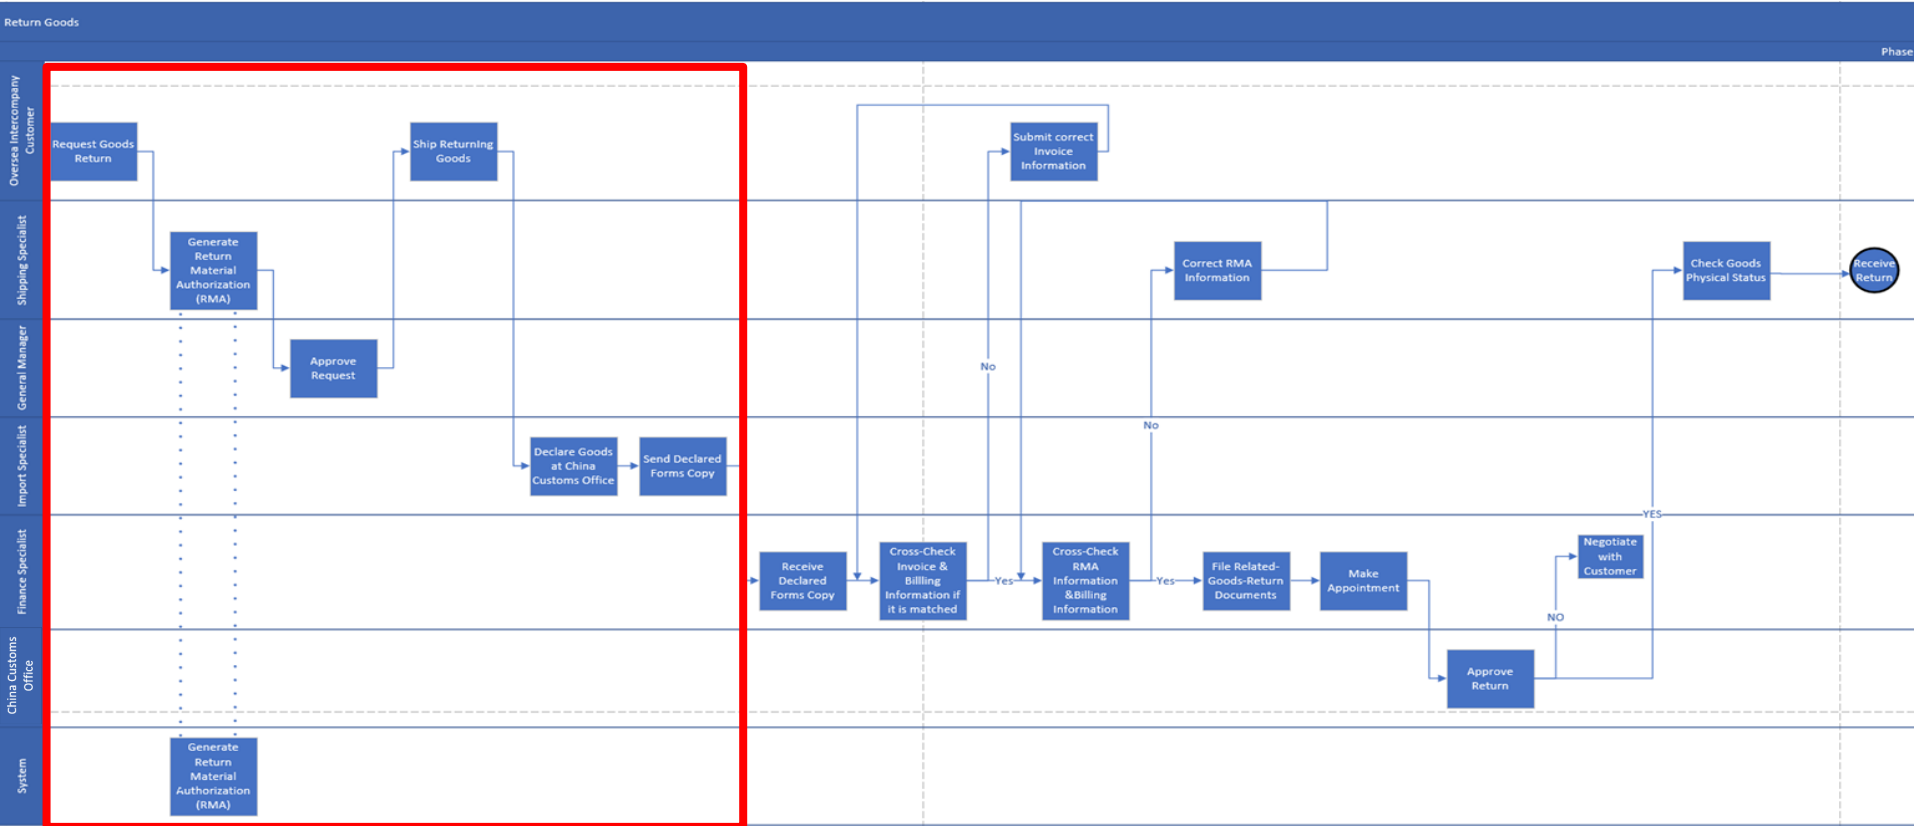

- Goods return process: originally designed to satisfy customer's needs for returning poor quality goods
- Current dilemma: massive TE's returning cases cannot pass the government's review
- Major reason: filed documents are inconsistent with standards required by the government
- Negative impact: lose cash flows & degrade TE's credit rating

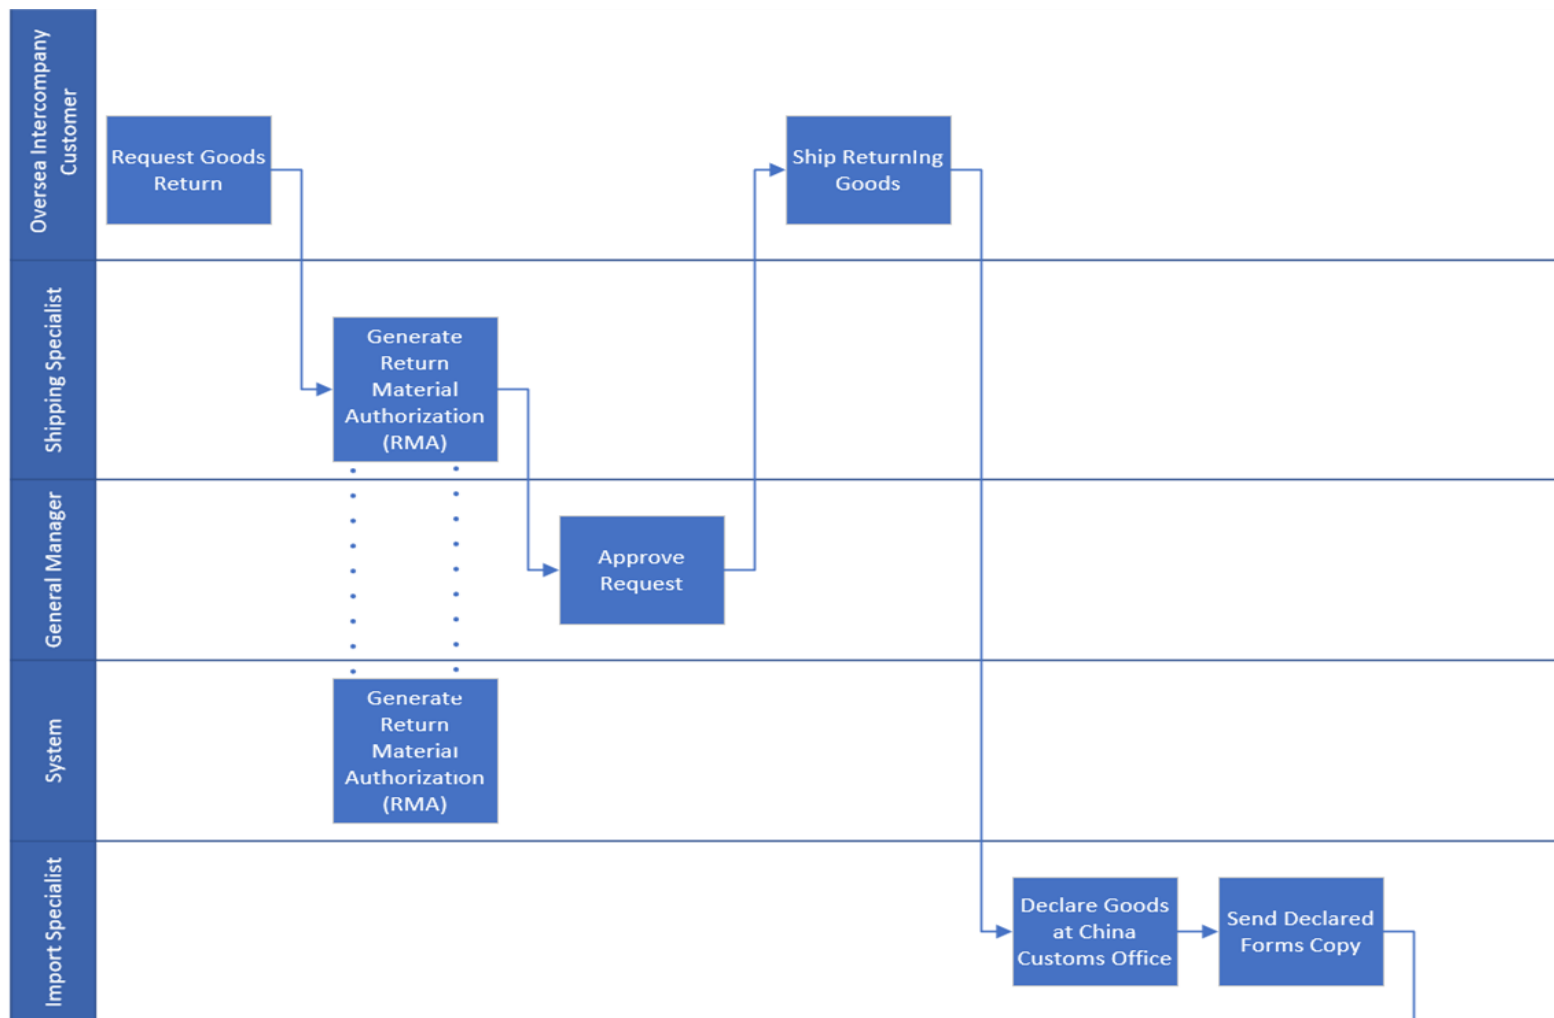

Interco-Customer Billing Report

The report compares normal billings-grey bar with impacted return goods billings-blue bar

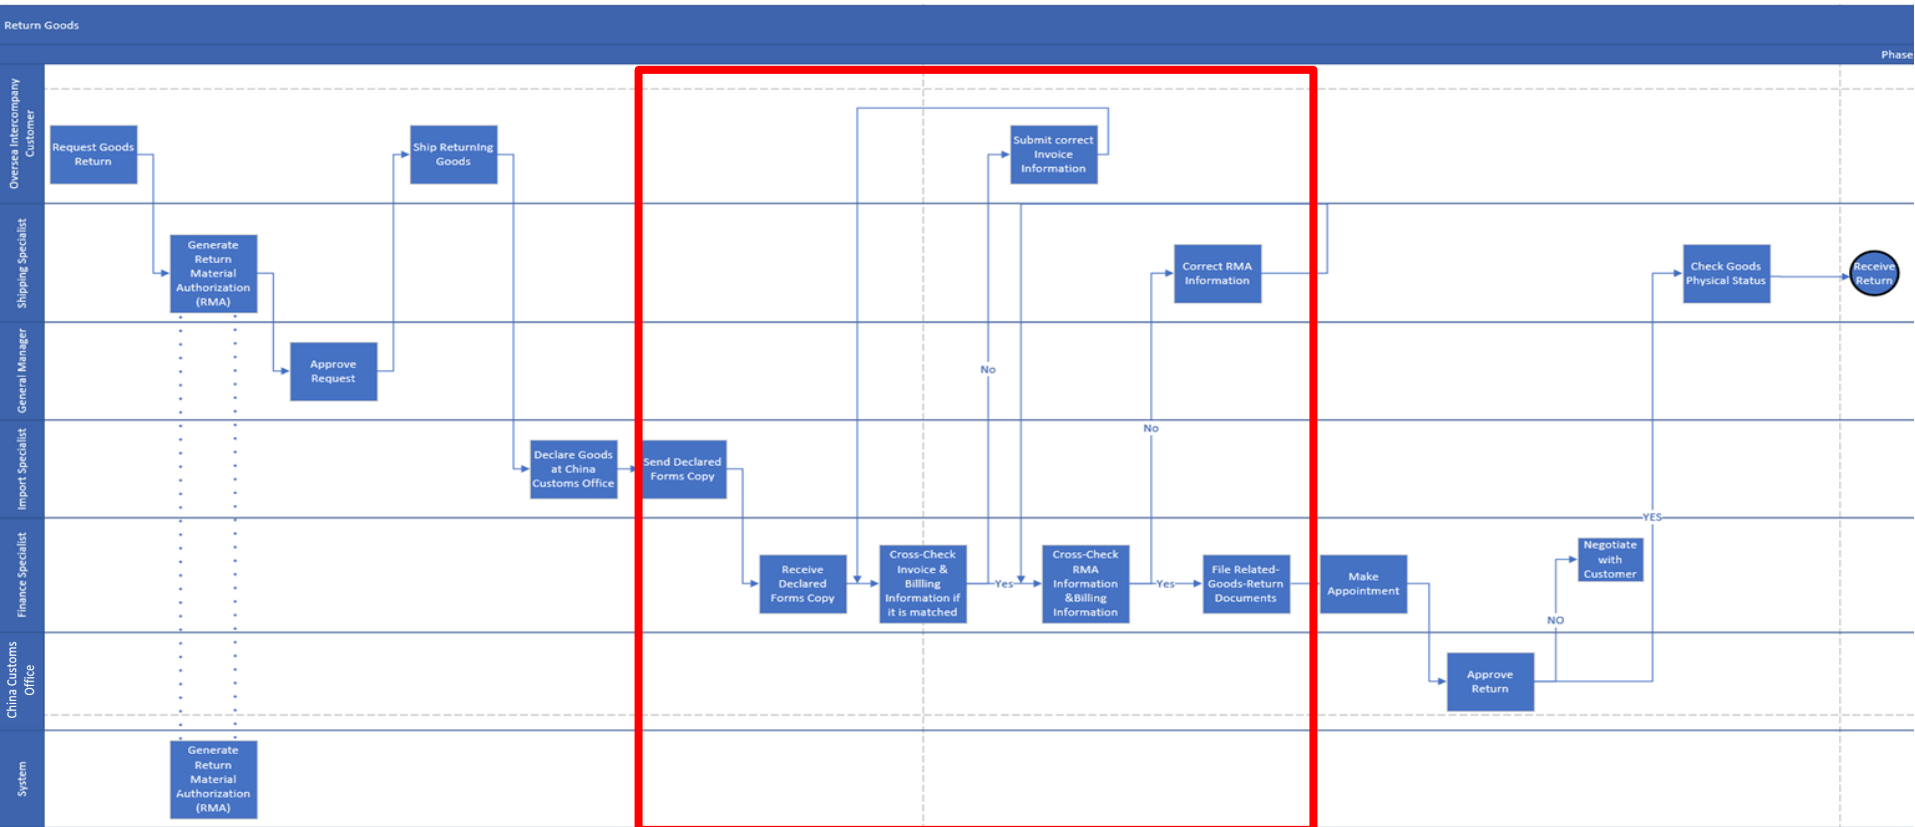

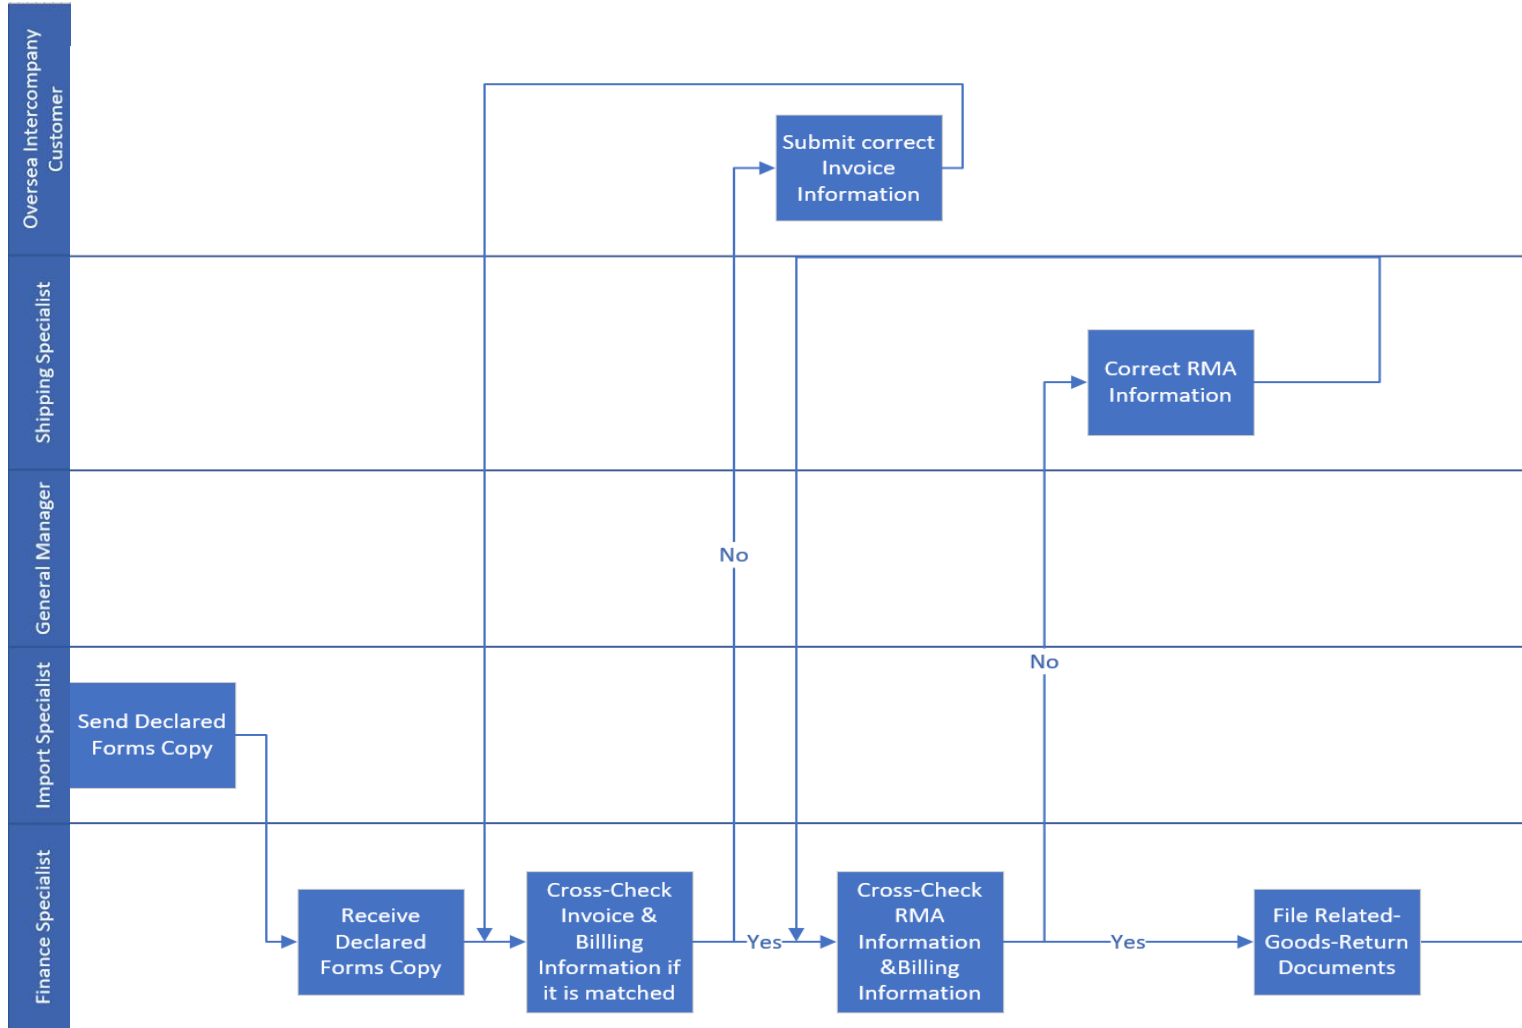

AS-IS Process

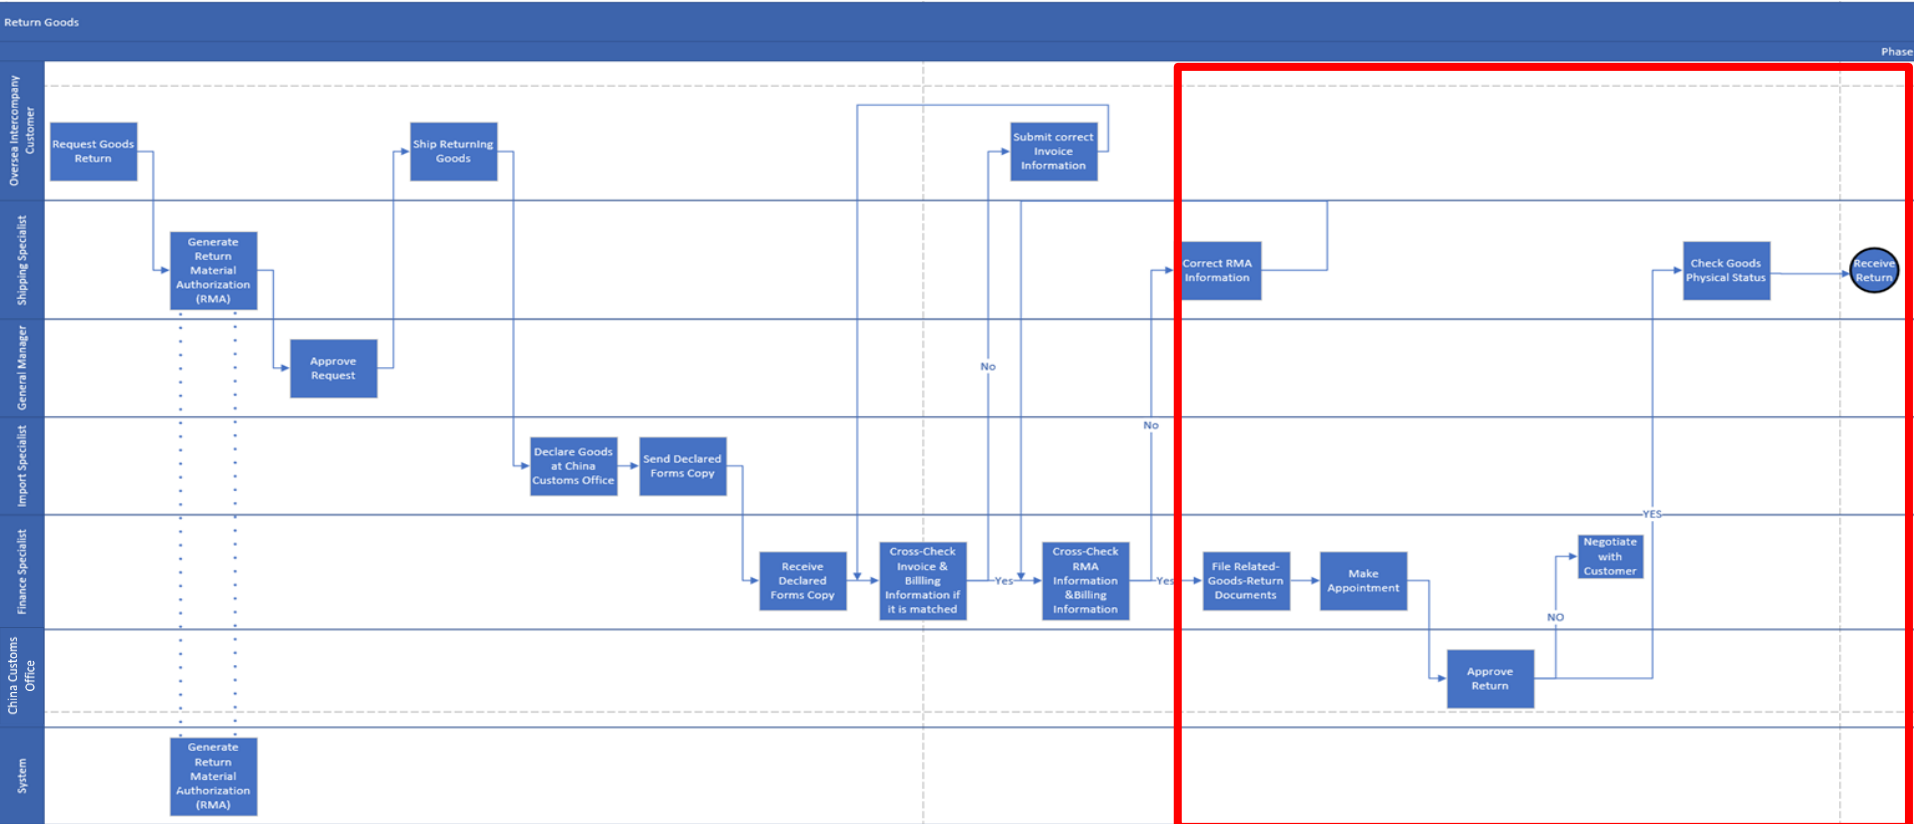

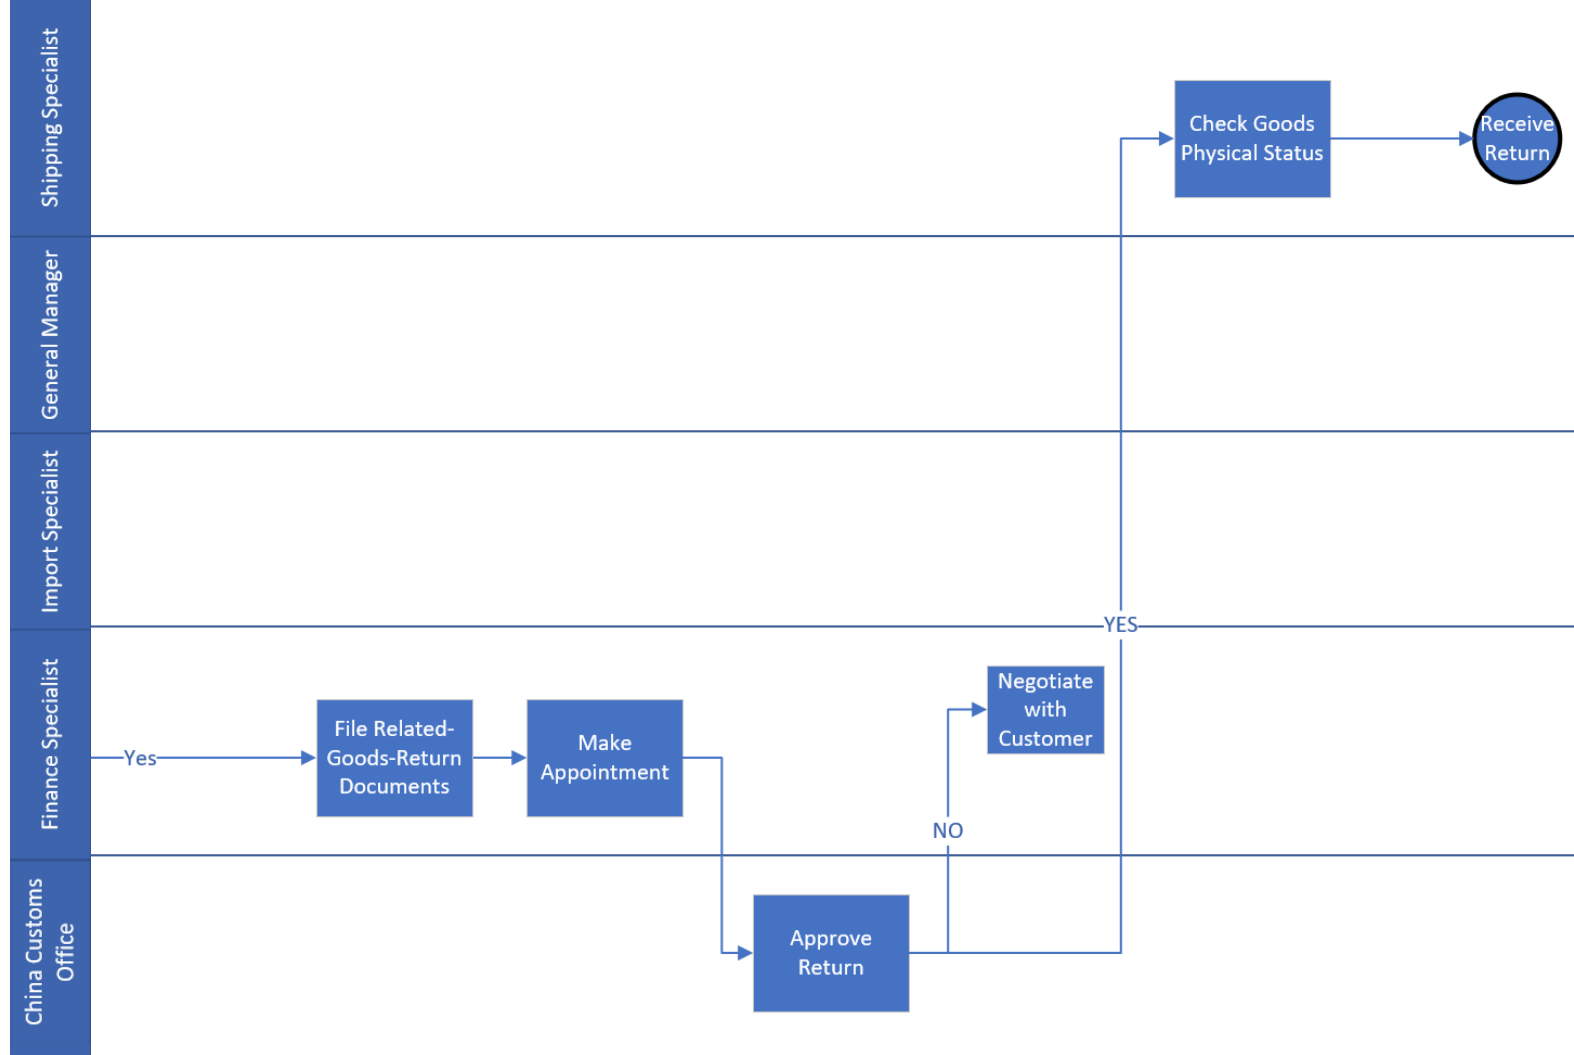

AS-IS Process

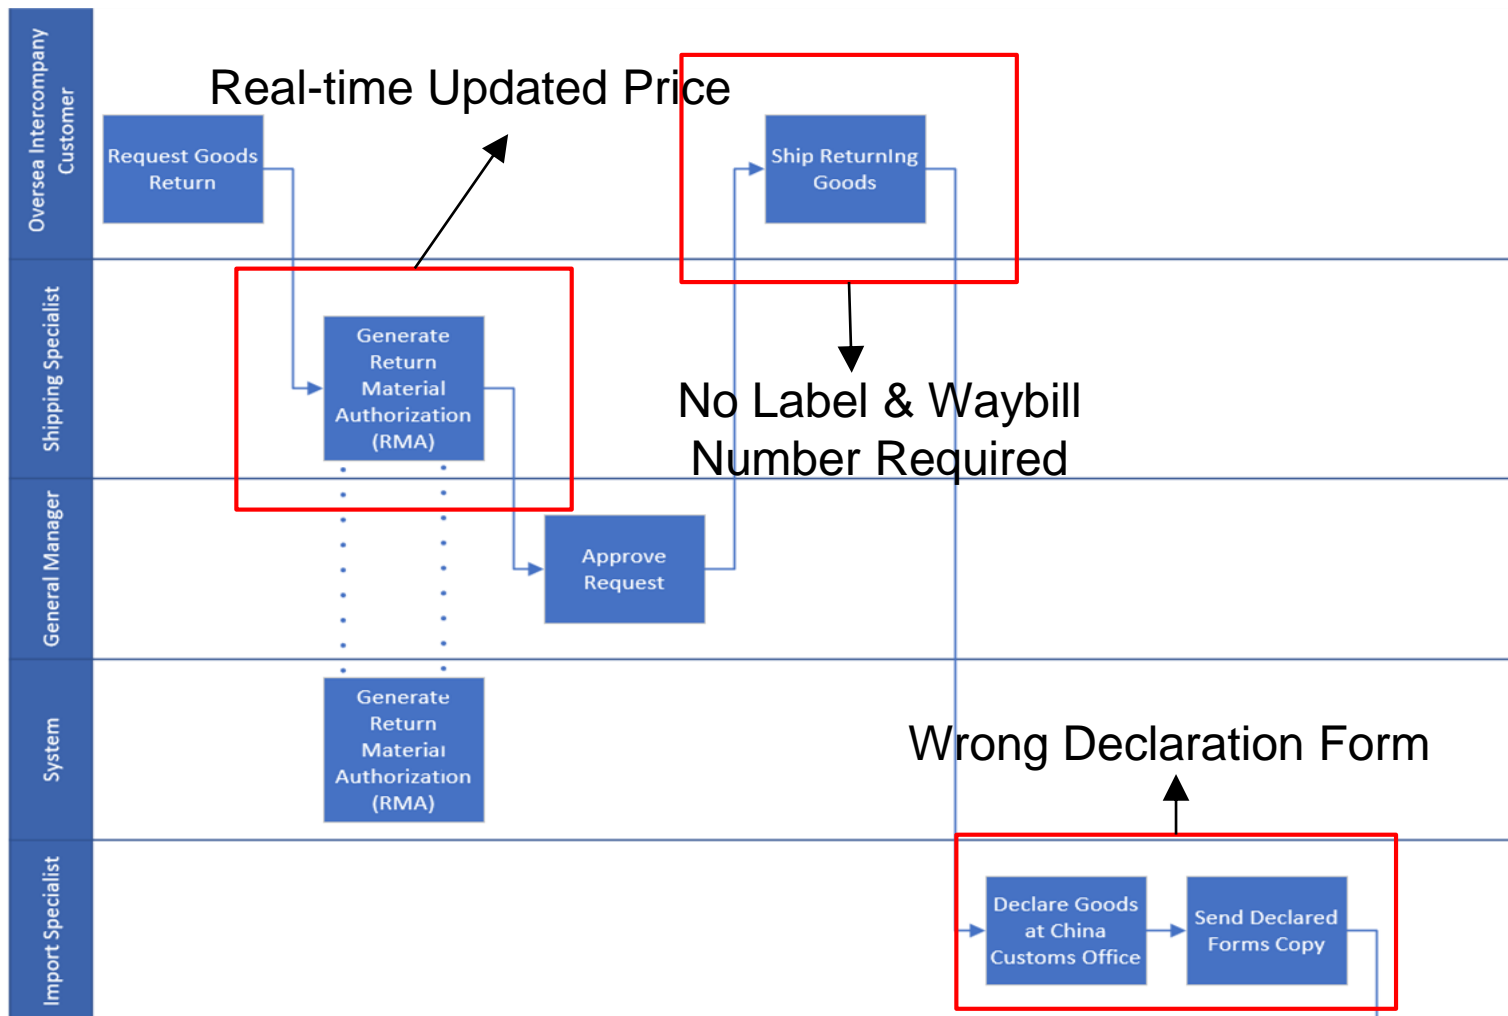

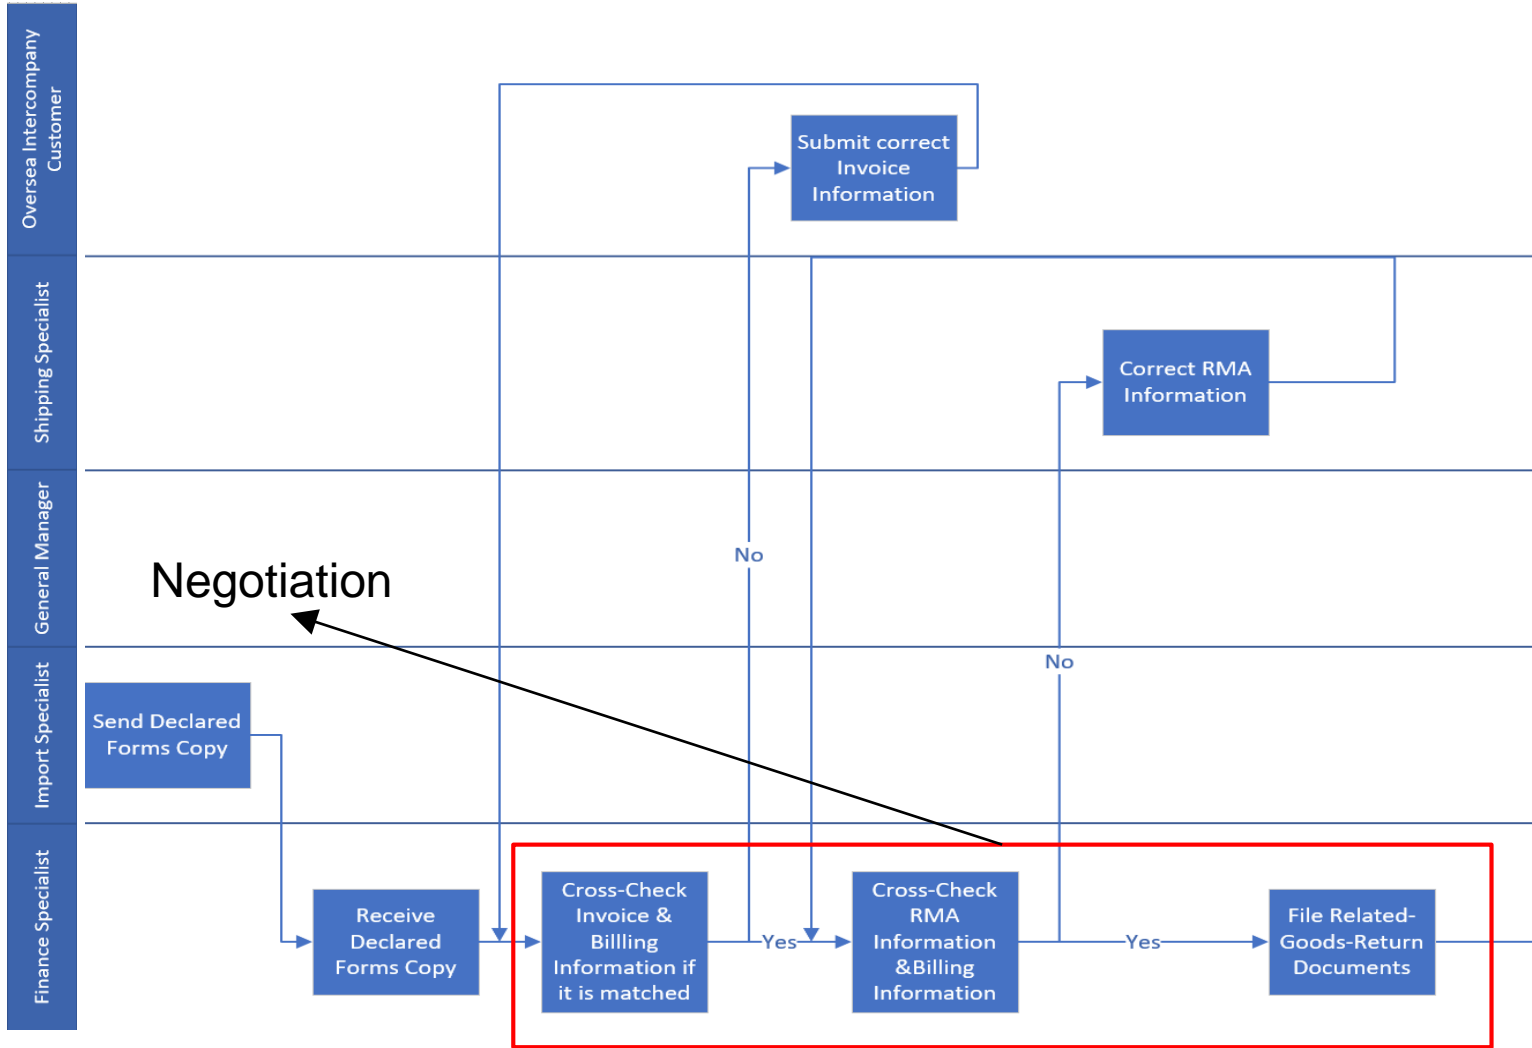

AS-IS Process

Issues in AS-IS Process

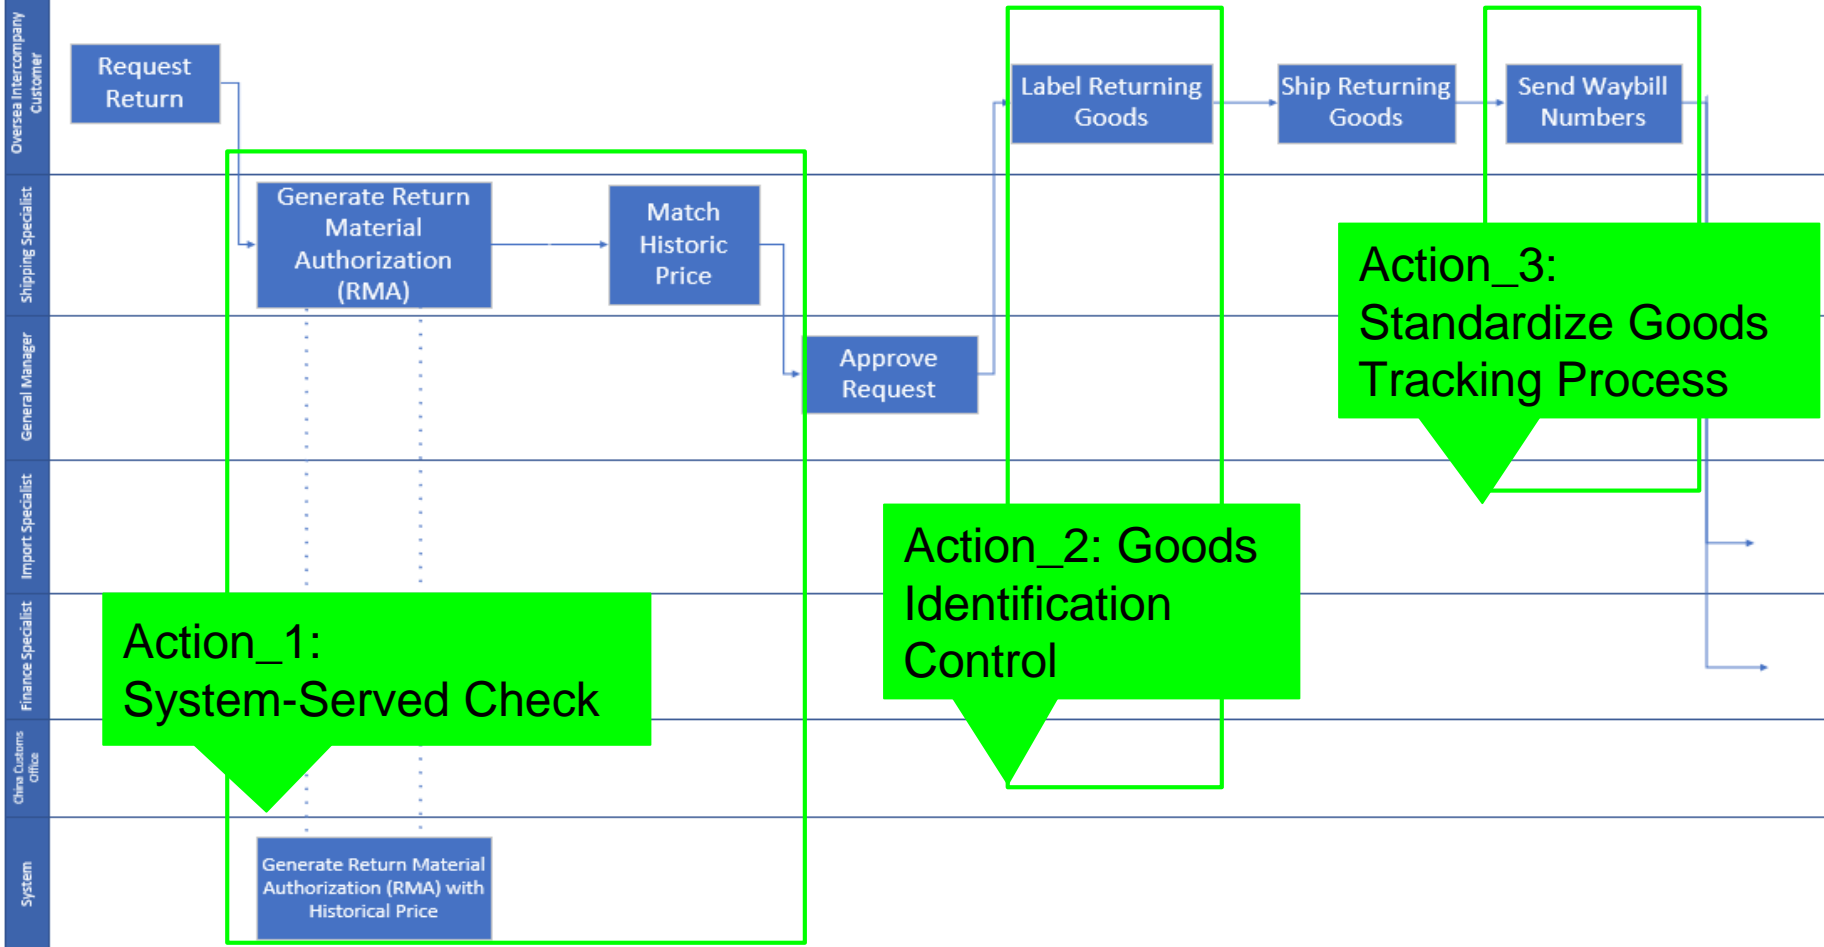

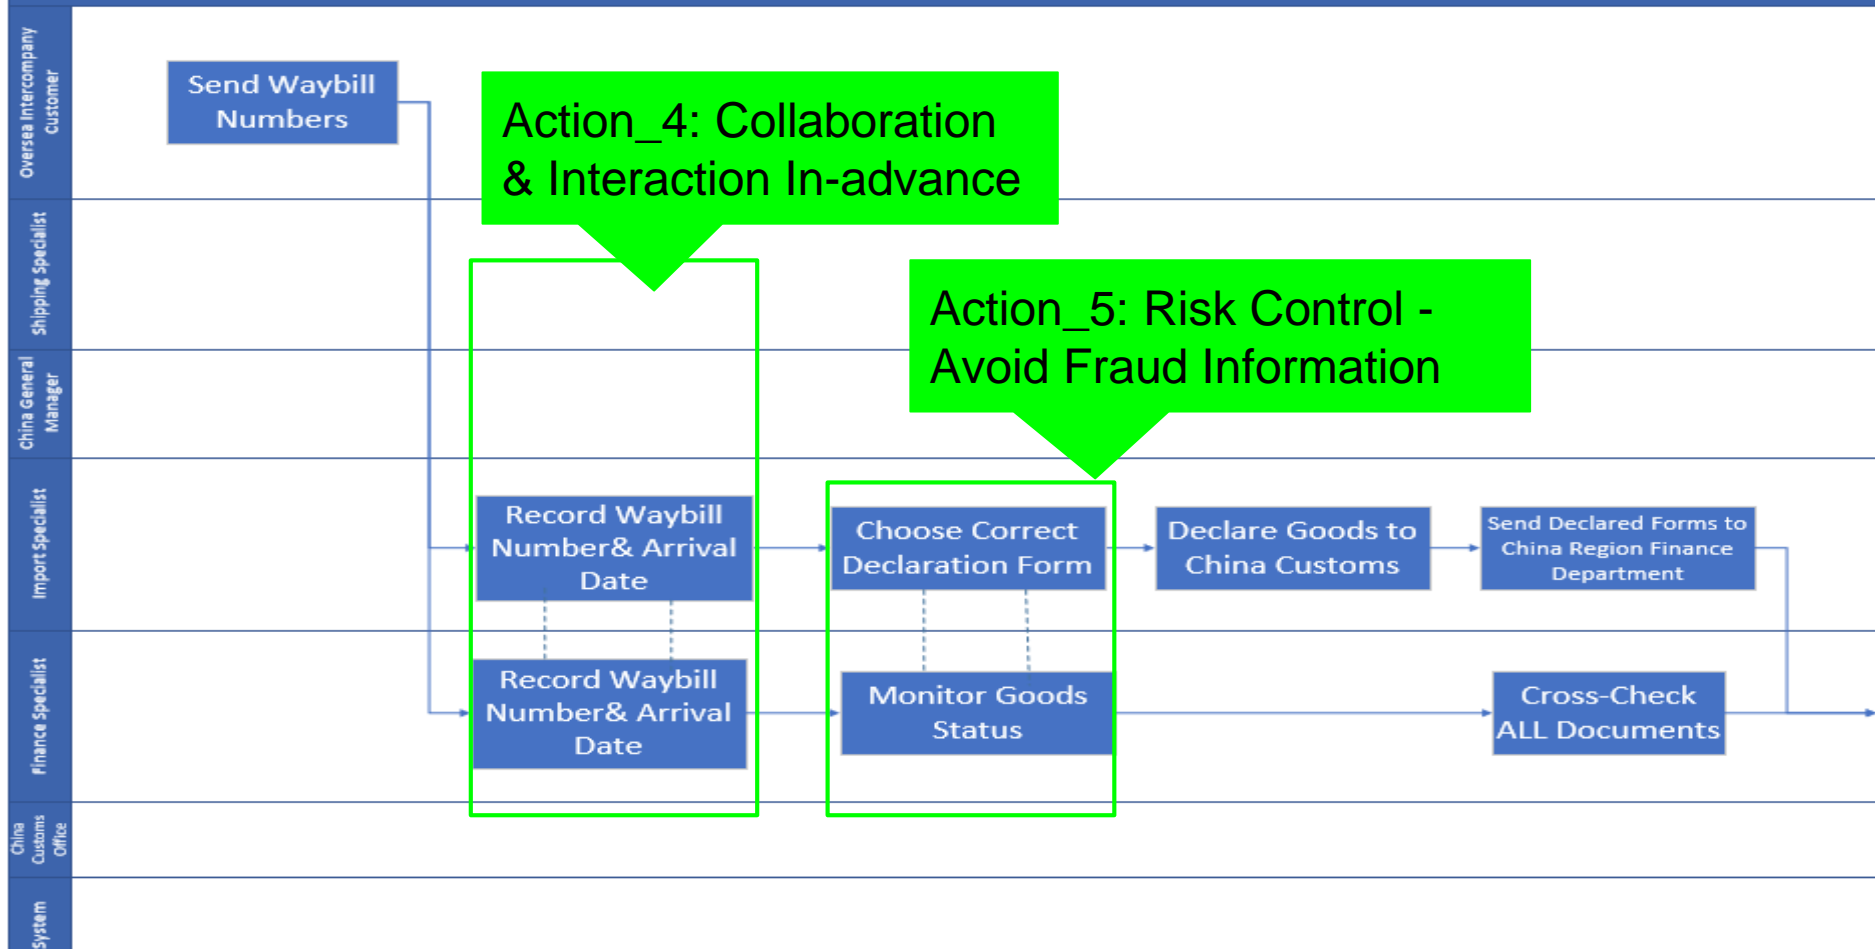

Improvements

- Match the actual historical price
- Mark as returning goods outside of the cartons and provide tracking number to consignee
- Make sure the expert agent fills in the correct information in import declaration checklist

TO-BE Process

The more control beforehand, the less communication and check will be needed.

Send Declared Forms
to China Region
Finance Department

Cross-Check ALL
Documents

File Related-Goods-
Return Documents

Make Appointment
with China Customs

Approve
